

REVIVED VINTAGE

"A contemporary take on a classic 1920s New York inspired design was the brief from the homeowner, combining the scale and grandeur of the era with modern convenience and storage. The marble benchtop and splashback was a must, chosen for its elegance and unique quality, as no two pieces are the same. Similarly, the cabinets were hand-painted to add a custom touch and contrast beautifully with the dark walls and floor. The Shaker style cabinets complement the existing windows, which provide an outlook for the long and narrow space. The attention to detail is evident in the choice of marine cup and cattle horn handles, along with the lantern lighting and hanging utensil holder, which complete the authentic bespoke look."

Designer: Susan Hasler for Sydney Kitchens

We love the attention to detail reminiscent of 1920s New York.
