

SEASIDE ELEGANCE

"The owners loved the high-quality construction and layout of their existing kitchen but were after a style that reflected their personal taste. Given the North Shore location of this grand home, the owners also wanted the look to suit the stunning ocean surrounds. Modern stools and stainless-steel appliances establish the contemporary style of this design, while the light colour scheme, classic-style cabinetry and timber floors create a relaxed, welcoming feel. The seamless appearance of this space has been achieved by using one long piece of marble for the island benchtop and integrating the fridge and dishwasher. The appliance cupboard and corner pull-out system provide plenty of storage, while the wine fridge and well-planned layout make this kitchen ideal for entertaining."

Designer: Sydney Kitchens

We love how the light colour palette and natural surfaces create a fresh and open feel.

EXPERT TIP

Integrating appliances ensures a more consistent style across the whole room.
