

We love the dynamic use of book-matched New York marble.

EXPERT TIP
Install backlights to bring your marble splashback to life in the evening.

GLORIOUS PROPORTIONS

“Our brief was to design a contemporary kitchen that was functional and made a statement in refined living as part of a major overhaul of this home. Along with the owners, we settled on a minimal palette of warmly contrasting finishes and textures combined with shadowline handles. Colour and finish are used to define the preparation and dining areas along the length of the gloriously proportioned 60mm Silestone Blanco Zeus island benchtop. At an impressive 6m long, and with comfortable seating for six people, the island is perfect for informal entertaining. Book-matched New York marble makes a stunning statement at the splashback and island. When backlit as night falls, they come to life. The generous pantry in New Age veneer Licoria is an elegant piece of joinery, and together with the adjoining floating display shelves answers the brief of utilising natural materials as well as linking the kitchen to surrounding living spaces. The dedicated appliance cupboard and slick, handleless drawers complete the project.”

Designer and manufacturer: Sydney Kitchens
