beautifully.*

CLASSIC MEETS CONTEMPORARY

"When it came to this warehouse conversion, creating a contemporary kitchen with luxury accents was key to producing a stunning room in the simple but beautiful space. The home is understated from the outside and when you open its doors, you are welcomed by the stunning entertainer's kitchen. Its grand proportions balance the open-plan room with its high ceilings and voids. With a predominantly subtle colour palette of white, grey and black, the kitchen features a touch of glamour and luxury by way of the gold stools and black-veined marble splashback. Textural interest was introduced with the industrial-style benchtops, while a butler's pantry cleverly conceals the fridge. The inclusion of the butler's pantry maintains symmetry in the main kitchen, which is open plan, so the butler's pantry is important for preparation and storage. Matt black cabinetry is a modern addition that beautifully complements the marble splashback, and two black hanging pendants echo the shade of the cabinetry, creating a sense of cohesion within the space. A large Caesarstone island with an elevated counter provides plenty of room for multiple people to prepare food or sit at the benchtop and enjoy a meal together. Filled with all the necessities you need in a kitchen, this beautiful space brings warmth and opulence to an industrial-style home that's simple in style."

Designer: Sydney Kitchens

EXPERT TIP

A butler's pantry is important for preparation and storage purposes.
